6:00 pm to 8:00 pm

Lake Wilderness Lodge

Main Hall

22500 SE 248th St, Maple Valley

The previous SR-169 widening project improved SR-169 from Witte Road SE to SE 240th Street, including non-motorized facilities (sidewalks and bicycle lanes), stormwater improvements, transit facility improvements, and providing two travel lanes in each direction. This phase of SR 169 corridor project will improve traffic operation, safety, access management, and non-motorized amenities in the vicinity of the Legacy Site between SE 253rd PI and SE 260th Street. Proposed improvements include widening SR 169 to a multi-modal urban corridor with two travel lanes each direction, sidewalks and bicycle lanes on both sides, street lighting, surface water enhancements, pavement rehabilitation, and roundabout intersection improvements at SR 169/SE 260th St and SR 169/SE 253rd Place. Access improvements at Rock Creek Elementary school and the Legacy Site will also be included, as well as school traffic improvements.

The City of Maple Valley is working with design consultant PBS Engineering and Environmental Inc. to develop a preliminary design of the T-45 project after receiving input from WSDOT, the school district, the community, and other stake holders. This public open house meeting will provide an opportunity for the City to share the preferred design alternative of this project with the public and for the public to ask questions and provide feedback.
